# IMMEDIATE START

Here are some examples of our Drupal CMS Websites

The applicants should be highly motivated to excel in their chosen field and be able to work supervised or unsupervised and we are looking for individuals that can be innovative, be able to think for themselves as equally as adhering to a list of do's and don'ts. We need 2 people for immediate start. The highest priority is the Graphic Designer Position. Almost equal urgency is the programmer / web developer position.

We have a very modern, comfortable office located close to the city centre (Kampala) with high speed internet and the latest Adobe software plus good quality Apple Macintosh laptops and desktops with large screens.

Take a look at examples of our work so that you can see visually what we are looking for the applicants to be able to produce, largely un-supervised. So long as the applicant has most of the skills asked for and has the ability to adapt and learn on the job, we would be happy with that.

email your application with C.V + .jpg examples of your abilities to [mike@KillaDesigns.co](mailto:mike@KillaDesigns.co)
